Mutual fund returns are total return and are prepared in accordance with SEC rules. All indexes above are unmanaged indexes. An individual cannot invest in an index. The Morgan Stanley Capital International (MSCI) Emerging Markets Value Index is a market capitalization weighted equity index designed to capture 85% of the total publicly market capitalization of global emerging markets. Performance for the benchmark is not available from April 2, 2007 (commencement of Fund operations). For that reason, the benchmark's performance is shown from March 31, 2007. The material is for your information only and is not a solicitation to buy or sell securities mentioned. This information is not intended to be used as the primary basis for investment decisions, nor should it be construed as advice designed to meet the particular needs of an individual investor. Investing in foreign securities may involve certain additional risks, including exchange rate fluctuations, less liquidity, greater volatility, and less regulation. Small company stocks may be subject to a higher degree of market risk than the securities of more established companies because they tend to be more volatile and less liquid. The performance illustrated and net expense ratio listed reflects fee waivers and/or expense reimbursements. In the absence of these waivers and/or reimbursements, the performance would have been lower. Before investing in any fund, please carefully read the prospectus which includes information concerning the fund's investment objectives, risks, charges and expenses.

Gross fund operating expenses before reimbursements and/or fee waivers: 2.44%.
